Ce nuancier est indicatif et doit être adapté à chaque architecture, en accord avec l'Architecte des Bâtiments de France. C'est une proposition de teintes douces. Il est possible de choisir des couleurs rehaussées en prenant garde à l'impact visuel sur la rue. Réaliser un échantillon sur une grande surface *in situ*, avant d'appliquer la teinte définitive. Des échantillons peuvent être demandé grâce au site du CAUE.

Les références de coloris sont celles des peintures ASTRAL, toutefois d'autres fabricants distribuent les mêmes teintes.

# PALETTE DE COULEURS COMPLÉMENTAIRE

Pour les menuiseries :

 C0.40.30	 L0.20.40	 Q0.20.40	 SN.02.57	 G4.05.81
 B6.40.40	 H2.20.50	 Q0.20.50	 J0.05.55	 JN.02.82

*Les références et coloris sont celles des peintures ASTRAL, toutefois d'autres fabricants distribuent les mêmes teintes.*

Pour les ferronneries et portails :
